Art Unit: 1714

This application does not contain an abstract of the disclosure in the manner required by 37 CFR 1.72(b). An abstract on a separate sheet is required. It is suggested that applicant submit a clean copy of the abstract, with no markings on a separate sheet.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1, 2 and 5-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In the claims (for example at claim 1, lines six and seven), applicant refer to a Vicat softening point higher than a melting temperature of a molding base resin. Applicant has not set forth any particulars for the molding base resin. Since the molding base resin is not identified in the claims, the resin does not serve as suitable point of reference to determine the appropriate Vicat softening point or any other property that applicant intends.

In claim 6, lines 2 and 3 and claim 8, line 2, the phrase "pelletizing again molding burrs" is confusing. In lines 11 and 12, the phrase "every time is supplemented" is confusing.

Therefor the claims are not understood.

No anticipatory art has been found. Applicant is reminded of his duty to disclose any art which he finds to be relevant to the examination of this application.

Any art which may be cited on form PTO-892 is cited only to document technological background information.
